

College Bound Scholarship Completion Rate Calculator

Use the boxes below to calculate an *estimated completion rate** for your school. This number will help you gauge your real-time school sign-up rate, and help you stay on track to meet your goals.

Steps

1. Look up your number of complete applications in the MS Toolbox. Put this number in box "1" below.
2. In box "2" enter the number of FRPL eligible students for a specific grade.
3. Now divide the number of complete applications by the number of eligible students. This is your current completion rate.

Class Of

1

Number of **complete** applications

÷

2

Current number of FRPL eligible students for a specific grade, reported by your district/school

=

3

Current completion rate

*Estimated Completion Rate: If you are estimating 8th grade completion rates you may want to account for students who were eligible in 7th grade.
